

Tank Manager™

The Safe State Solutions Tank Manager System allows you to monitor all of your tanks and silos. Users can set individual tank high/low parameters for level and temperature to initiate a pump shutdown, thus preventing tank overflows. In addition, you can view tank supply, return, and fill valves with the push of a button.

The System also allows you to send emails and texts to specific individuals notifying them during alarm events that action needs to be taken.

Completely mobile-friendly, the System can be viewed on any internet-compatible device connected to your corporate network. Simply put, the Tank Manager gives you the control to run your business while it monitors your tanks.

- Prevent Tank Spills
- Avoid Waste and Contamination
- Remote Control All Valves and Pumps
- Know Exact Silo and Tank Levels 24/7 from Anywhere
- New Non-Contact Accu-Level Technology

The Best Way to Manage Your Tanks and Silos.

- Frac Sand
